-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lukehart.

Lukehart discloses a thumb pick for a guitar comprising a pick body and a belt body(2) which fixes the pick body to a finger, characterized in that the pick body is integrally extended with a protrusion portion(3) for picking the strings from a base end portion made into contact with the thumb, the belt body is separately formed from the pick body, and both end portions of the belt body is adjustably connected to the pick body. Lukehart also discloses the use of a bent portion along the side face of the thumb is formed at the end of the base end portion of the pick body, an engaging protrusion(12) is provided by protruding from the end portion of the bent portion, and the end portion of the belt body is adjustably connected to the engaging protrusion (see figure 2).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lukehart in view of Brundage.

Lukehart does not disclose the use of a bent cut.

Brundage discloses the use of a pick with a bent cut is provided from a protruded portion to a base end portion of the pick body, a substantially tongue-like connecting piece is formed on the inside of the cut, and the connecting piece and one end portion of the belt body is detachably connected (see figures 1 and 2).

It would have been obvious to ordinary skill in the art at the time the invention was made to modify the pick as disclosed by Lukehart with the bent cut as disclosed by Brundage in order to provide a band with a specified desired tautness.
